PROFESSIONAL SUMMARY

Software Developer with solid experience in backend development, API architecture, software support, and system optimization within agile environments. Skilled in building scalable and maintainable solutions using Python, JavaScript, FastAPI, and modern software engineering practices. Experienced in contributing to enterprise-level applications, troubleshooting and resolving production issues, and improving system performance, reliability, and maintainability. Strong ability to collaborate with cross-functional teams, translate business requirements into effective technical solutions, and drive continuous improvement through clean code, automation, and problem-solving.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, C#, Dart, PHP, HTML, CSS
- **Frameworks & Technologies:** FastAPI, Django, Flutter, Laravel
- **Backend & APIs:** REST APIs, Firebase, Backend Integrations
- **Databases:** SQL, MongoDB, NoSQL
- **Tools & Platforms:** Git, GitHub, Bitbucket, Visual Studio Code, Android Studio, Xcode Cloud / Infrastructure AWS, Kubernetes
- **Testing & Methodologies:** Software Debugging, API Testing, Agile, Scrum, Kanban
Languages: Spanish (Native), English (C1), German (B2)

PROFESSIONAL EXPERIENCE

Code Road Service Support Engineer / Support Analyst 2020 – Present

- Contributed to the development and improvement of internal business applications, focusing on system stability, performance, and maintainability.
- Investigated and resolved application issues through troubleshooting and debugging, improving operational efficiency and user experience.
- Supported system enhancements and feature implementations aligned with evolving business and technical requirements.

- Collaborated with development and technical teams to optimize processes, implement effective solutions, and support continuous system improvement.

Jalasoft Software Developer (2024 – 2026)

- Contributed to the development, enhancement, and maintenance of enterprise software solutions aligned with business and client requirements.
- Designed and implemented new features while integrating evolving business needs into existing platforms and services.
- Investigated, debugged, and resolved production issues, improving system stability, performance, and maintainability through code optimization and sustainable fixes.
- Collaborated with cross-functional teams and stakeholders to translate functional requirements into scalable and reliable technical solutions.

Qualitas Test Team Junior QA Analyst (2020)

- Participated in test planning, execution, and defect tracking for software quality assurance processes.
- Assisted in validating functionality, documenting issues, and supporting testing environments and reporting.
- Contributed to software quality and release readiness through structured QA practices.

Freelance Backend Developer 2019

- Designed and developed REST APIs using FastAPI to support data exchange between frontend and backend systems.
- Built backend logic and endpoints for application functionality and data handling.
- Supported API structure, testing, and implementation for scalable integration needs.

EDUCATION

- Escuela Militar de Ingeniería – La Paz, Bolivia Bachelor of Science in Computer Science Graduated First of Class
- Universidad Católica Boliviana – La Paz, Bolivia Diploma in Quality Assurance
- Simón I. Patiño University – Cochabamba, Bolivia Full Stack Development Diploma Opcional
